

## FUNCTIONS

A function with parameters has a couple of requirements:

- By calling a function with arguments, you are telling a function, "Hey function, when you execute, use these values where you have

```
#include <iostream>

std::string make_sandwich(std::string ing1, std::string ing2) {
    std::string sandwich = "";
    sandwich += "bread\n";
    sandwich += ing1 + "\n";
    sandwich += ing2 + "\n";
    sandwich += "bread\n";

    return sandwich;
}

int main() {
    std::cout << make_sandwich("peanut butter", "jelly");
}
```
